ideas

FROM THE JASPER DESK FAMILY

We invite you to review our Ideas brochure. This presentation summarizes our offering, as well as our special combination of experience and craftsmanship that goes into everything we do at Jasper Desk. As you browse these pages, you will find highlights of our standard offering as well as our custom capabilities. As long-time crafters of office furniture, we want you to know that we stand ready to be a resource for your everyday needs and one-of-a-kind solutions. Keep in mind that more information about our company and our products is available from your Jasper Desk representative, online at jasperdesk.com or by contacting us directly.

- Exclusive “Jasper Desk Quality” comes only from a production team who takes pride in knowing personal integrity goes into everything they build.
- Extensive in-house capabilities and controls ensure consistent high quality throughout our vertically-integrated manufacturing.
- Jasper Desk has the means for building custom casegoods, workstations, reception stations and conference room furniture with FSC and BIFMA level® certification.
- FSC-certified veneer and wood are specified for products from Jasper Desk, an FSC Chain of Custody certificate holder.

insights

There are many ways to build furniture. The founders of Jasper Desk decided on materials, methods and craftsmanship that would produce furniture built to look great and hold up under everyday use. As true today as it was then, the Jasper Desk approach to environmentally-responsible manufacturing has a loyal following from customers who recognize durability and problem-free reliability starts with what goes inside. This is the reason why Jasper Desk customers talk about “Jasper Desk Quality”: it is about more than the parts and pieces; we make each product as a statement of our legacy as well as who we are as individuals and what we stand for as a company.

Highlights of Jasper Desk materials and construction follow. For exact specifications by series, please refer to the current Jasper Desk price list.

Shown on Cover: Connection L-Unit with three bench pedestals and a Riley High-Back Executive Swivel.

joinery

Joining together the panels inside a desk, credenza or other cabinetry makes all the difference. Jasper Desk uses tried and true methods, including cleat construction and mortise and tenon.

pulls

Drawer and door pull options are offered for each series in a selection of styles and finishes. For complete information about choices by series, please refer to the current Jasper Desk price list.

wire management

Wire management capabilities and electrical accessories vary by series. To find information and availability by series, please refer to the current Jasper Desk price list.

TABLE OF CONTENTS

– Indiana’s managed forests provide 70% of the veneer and wood used in products from Jasper Desk.

– Making components on-premises allows engineering and manufacturing of custom designs built to customer specifications.

– American made since 1876 in Jasper, Indiana.

Products from Jasper Desk’s In Ten quickship program are available within ten working days from receipt of a credit approved order. Large quantities may be subject to additional lead time. Refer to the Jasper Desk price list for the specific models available through the In Ten program.

finishes

Once everything inside is carefully constructed to specifications, each Jasper Desk model receives a multi-step catalyzed varnish finish. The finish ensures maximum durability, chemical resistance, color retention and clarity. Wood drawer interiors and exteriors are finished with sealer, sealer sand and catalyzed varnish.

drawers

Of all the ways to build a drawer, wood construction with dovetailed corners is the method in most Jasper Desk series. Others are mitrefold construction with dowel joinery. These sturdy drawers ride on full extension “A” grade ball-bearing suspensions. Locking specifications by series appear in the Jasper Desk price list.

surfaces

The unseen materials under the lustrous wood veneer surfaces receive an equal amount of care and consideration. Tops, panels and doors have balanced construction, with most tops having solid wood edges with mitered corners. Panels and doors also have balanced construction, with 3/32” wood banding.

custom built

SHOWN: Reception station with raised glass surface and metal inlay.

Whether you are modifying one of our products or designing custom furniture, we will turn your ideas into beautifully engineered, cost effective furniture. We can tell you from experience, it is easy to get started.

We work closely with interior designers and respond to contractors to ensure tolerances are met and power and data access points are correctly located. To learn more, please contact us about custom built products to meet the exact needs of your project.

SHOWN: Desk and credenza with wall-mount storage.

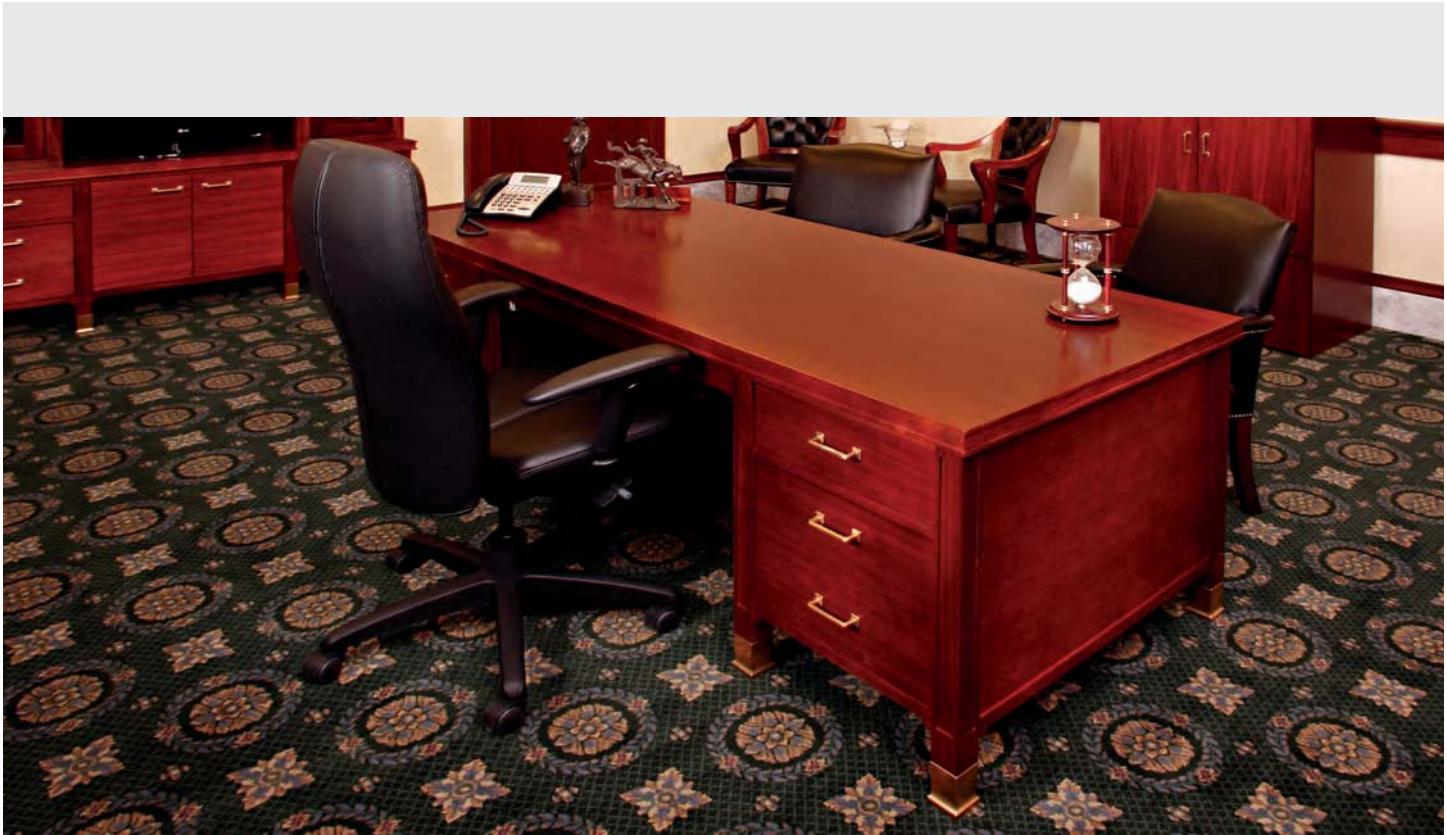

To get started, email any of the following items to Vic Stetter at vstetter@jaspergroup.us:

For a modification, let us know which series you want to modify and how.

For a custom, send us a drawing, a sketch or you can include snapshots of what inspired you so we better understand the desired furniture.

Note: If you want us to create a drawing with the furniture in place, please send us a floorplan in a CAD file.

Custom built products from Jasper Desk have FSC and BIFMA level certification.

SHOWN: Furniture reproductions for historic renovation.

SHOWN: Furniture reproductions for historic renovation.

SHOWN: Conference table with specially shaped top.

Custom built products from Jasper Desk have FSC and BIFMA level certification.
